WPC DECKING

OUT DOOR WPC Decking

Spacewood is proud to present its premium WPC (Wood-Plastic Composite) Decking, a product that epitomizes durability, elegance, and environmental stewardship. Perfect for a wide range of outdoor applications, WPC decking offers a sophisticated solution that seamlessly combines the beauty of natural wood with the resilience and low maintenance of modern composite materials.

Here are some of the key features:

1. **Durability Weather Resistance:** WPC decking is highly resistant to weather elements like rain, snow, and UV rays. It doesn't warp, crack, or splinter over time.
2. **Insect and Rot Resistance:** Unlike natural wood, WPC is impervious to termite attacks, rot, and mold growth.
3. **Low Maintenance Easy Cleaning:** Requires minimal cleaning—usually just a quick wash with water or mild soap. No need for regular sealing, staining, or painting.
4. **Stain Resistance:** Resistant to stains from food, drinks, or oils, making it ideal for outdoor entertaining areas.
5. **Aesthetic Appeal Variety of Colors and Finishes:** Available in a range of colors, finishes, and textures that closely mimic the appearance of natural wood.
6. **Consistent Appearance:** Unlike wood, WPC decking doesn't fade or change color significantly over time.
7. **Environmentally Friendly Recycled Materials:** Often made from a blend of recycled wood fibers and plastics, reducing the demand for virgin materials.
8. **Sustainability:** Helps in reducing deforestation and plastic waste by utilizing recycled content.
9. **Ease of Installation Inter-locking Systems:** Many WPC decking options come with interlocking systems, making installation straightforward and less time-consuming .
10. **Dimensional Stability:** WPC decking remains stable over time, with less expansion and contraction compared to natural wood.
11. **Safety Features Slip Resistance:** The surface texture of WPC decking is designed to be slip-resistant, even when wet, enhancing safety, especially around pools .
12. **Splinter-Free:** Unlike wood, WPC decking is splinter-free, making it safer for barefoot walking and for children and pets.
13. **Long Lifespan Longevity:** Designed to last longer than traditional wood decking, with many manufacturers offering warranties of 10 years . Resistant to Wear and Tear, Maintains its appearance and functionality even with heavy foot traffic .
14. **Modular Installation :** In-case of removal of one profile other profiles can be reused due to its modularity in nature of installation.

These features make Spacewood WPC decking a versatile and reliable choice for various outdoor applications, offering a balance of practicality, durability, and aesthetic appeal.

WPC DECKING

Easy to install and maintain

Installation requires standard woodworking tools. Invisible stainless steel clips are used to fasten the boards with even spacing. Composite decking does not require painting or oiling. Dirt can easily be removed using a high-pressure water jet.

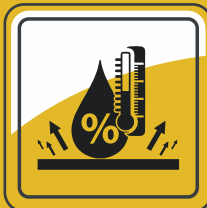

Environmentally friendly and economical

SPACEWOOD decking boards are made from eco-friendly and 100% recyclable materials. No trees are cut down for the production of SPACEWOOD decking boards. Wood fibers used in manufacturing are taken from carpentry factory surpluses.

Durability with 10 year Guarantee

SPACEWOOD terrace boards have a 10-year guarantee period. Composite terrace boards do not break, deform, crack, rot and do not decay.

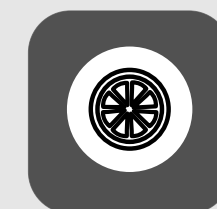

Resistant to humidity and weather fluctuation

Even extreme temperature fluctuations, intense sunlight and high humidity do not affect the physical and mechanical properties of WPC decking. SPACEWOOD decking boards are also highly resistant to UV rays.

Durable and do not form cracks

SPACEWOOD decking boards are able to withstand large impacts, and they are highly resistant to the harmful effects of fungal and insect exposure.
